DEMU Fixing anchors

DEMU Fixing anchors from HALFEN are intended to be used for a safe and permanent anchorage of fixtures in concrete. Different anchor dimensions (max. thread size M42) and materials for corrosion protection (electroplated, hot-dipped galvanised and stainless steel) ensure a sophisticated product range. As cantoneiras

DEMU Fixing anchors T-FIXX® and Bolt anchor types 1988 and 1985 (with nailing plate) with European Technical Approval.

Examples for typical application:

- ✓ Fixing of props and connecting devices on precast elements
- ✓ Fixing of railings for balconies and bridges
- ✓ Fixing of utility equipment, power lines
- ✓ Fixing of steel ladders, stairs and profiles
- ✓ Fixing of safety devices
