

# REACT 747 SERIES

Heavy Duty Vehicular Seismic System for Joint widths 75mm to 150mm

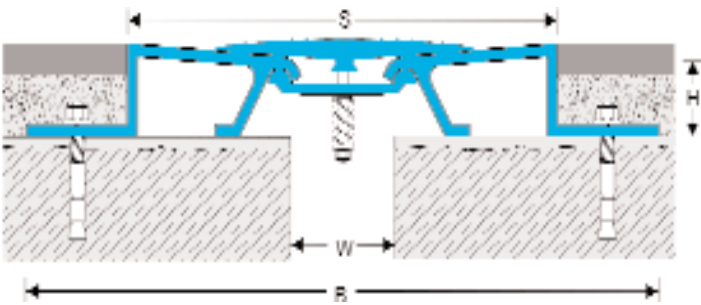

Ideal for use in environments such as airports which exhibit a variety of requirements - pedestrians, small wheeled trolleys, baggage trucks and high load vehicles

- "No-bump", constant level, low profile
- High load rated
- Designed for use with high quality finishes, marble, granite
- Reduced sightline ideal for use with carpet and vinyl
- Seismic horizontal, vertical and shear movement
- Central swivel s-plate centres the cover plate over the joint
- Patent pending

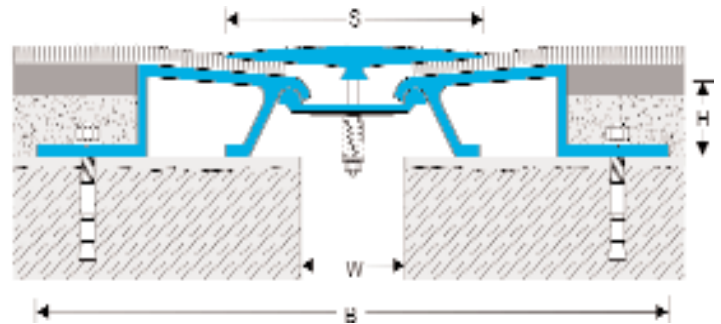

### Options

- Vapour Barrier
- Fire Rated
- Separate installation datasheet available

747-A01-050 Floor/Floor

Reduced sightline with carpet/vinyl
