

joint profile for ceramic steps

foloround™ RD

FOLOROUND RD-ON Natural Brass

Due to the natural properties of brass, it ensures a high tolerance to mechanical impacts and in areas subject to chemical presence. It still contributes to maintain an elegant finish to the coverings applied. Through contact with moisture or chemicals brass may oxidize on the exposed surface, but the problem is easy to solve by just buffing the profile with a conventional polishing product.

FOLOROUND RD is a rounded profile which gives a joining edge to the steps of the staircase. It has high tolerance to mechanical impact and perfectly protects the corner edge. Thanks to its brass shine, this profile is considered ideal for most domestic and commercial stair coverings purposes.

Vertical anchorage with dovetail internal cavity groove.

Illustrated scale dimension 1:1

Material: Extruded Natural brass
 Length: 2,70 meters
 Anchorage improved on the vertical side
