

brass stair nosing profile for ceramic and wood coverings

folostair™ FO

FOLOSTAIR FO-ON Natural Brass

Thanks to the natural properties of brass, it ensures a high tolerance to mechanical impact and in areas subject to chemical presence. It still contributes to maintain an elegant finish to the coverings applied. Through contact with moisture or chemicals brass may oxidize on the exposed surface but the problem is easy to solve by just buffing the profile with a conventional polishing product.

FOLOSTAIR FO is a technical yet elegant stair edging profile suitable for ceramic or wood laying coverings. It is made of solid brass, easy to apply. It is a valid substitute for the "special piece" ceramic nosing which is far more expensive and more subject to breakage. The **FOLOSTAIR FO** enhances the step edge's elegance with most types of tiles and its top grooved surface gives the stair the sufficient safety feature. This profile is suitable for both domestic and commercial environments.

Vertical dovetail anchorage.

Illustrated scale dimension 1:1

Material: Extruded Natural brass
Length: 2,70 meters
Anchorage improved on the vertical side
