

# rounded terminal profile edge trim

## folovario™ DC

This type of profile represents our innovative program for transition and finishing profiles for adjacent floor coverings with different levels. Due to its very special design, **FOLOVARIO** features a multi-height adaptability which can range from 7 mm to 14 mm by simple inclination. This type of profile is to be glued on existing floors or as finish terminal floor edging to portray an extremely elegant touch. For gluing application we recommend to use our special adhesive. Illustrated scale dimension 1:1

### FOLOVARIO DC 22 OL Polished Brass

Full brass profile to guarantee the tolerance and endurance to chemical and mechanical solicitations. Through the contact of moisture or corrosive media, brass may oxidize on the exposed surfaces. This situation can be easily solved by buffing the product with a conventional polisher to return to its original shine.

Material: Extruded Polished brass  
Length: 2,70 metres

### FOLOVARIO DC 22 A\* Anodised Aluminium

This aluminium version is available in three different colour finishes: Silver, Gold, Bronze and it blends well with several flooring materials utilized in domestic environments.

Material: Extruded Anodised aluminium  
Length: 2,70 metres  
Colours\*: Silver, Gold, Bronze
