

terminal and transition profile for existing floors

folovario™ DK

FOLOVARIO DK is a product specially conceived for domestic and light commercial use. The different coloured versions contribute to an outstanding decorative finishing. It is supplied with a special high quality elastomer adhesive for easier application and can compensate floor coverings with height differences between 7 and 16 mm. Simply apply pressure by hand on the profile to fix to the dry floor and make sure that the surface to cover is free from any dirt or grease.
Illustrated scale dimension 1:1
