

# joining transition trim for floors at different heights

**FOLOZERO ZRM** profile is the ideal solution for joining two floors at different levels, between a ceramic covering and one in moquette carpeting for instance. This trim allows a 4 mm progressive sloping difference to the next floor to match thus making safer when treading over the connecting floors. The ramp inclination has been conceived for vehicle and wheel carts transit. Illustrated scale dimension 1:1

## folozero™ ZRM

### FOLOZERO ZRM-IL Stainless Steel AISI 304 - DIN 1.4301
