

# internal corner joining profile

interjolly™ IJ

**INTERJOLLY** optimizes the corner joining of the tile covering between floor and wall, while leaving the necessary space for the expansion with adjacent walls. This profile has a perforated flange which is applied under the tile. It can also serve as a cove base for shower tray and bathtub perimeter so to avoid the silicon lining which inevitably turns a yellow unaesthetic discoloured tone in time. The moulded cove base made with the application of the profile makes every internal corner and crevice extremely easy to clean and therefore more hygienic.

Illustrated scale dimension 1:1

## INTERJOLLY IJ-P\* Full body coloured Synthetic Resin

The product is entirely of a solid colour compound and not colour coated. This can be utilized in the most diverse environments which require coverings. Moreover, is easy to cut to size so the laying may result quicker and less time consuming therefore one would economize in terms of labor over the entire project budget.

This product maintains a good performance over time against UV rays and small scratches are not so visible, tolerates impact and diluted chemicals present in most detergents.

## INTERJOLLY IJ-IL Stainless Steel AISI 304 - DIN 1.4301

Stainless steel profile, AISI 304 standard, ensures high tolerance to most of diluted chemicals or detergents present in laboratories, food processing plants, commercial kitchens, slaughter houses, breweries as well as bathrooms for private and public areas.

The stainless steel profile section is not exactly identical to the Resin model because the steel production process is different from the plastic extrusion one.
