- 12 *Design cover Kessel* made of stainless steel, with or without Lock & Lift system
- 13 *Design cover Oval* made of stainless steel, with or without Lock & Lift system
- 14 *Design cover Festival* made of stainless steel, with or without Lock & Lift system
- 15 *Design cover Slot* made of stainless steel, mit oder ohne Lock & Lift-System
- 16 *Design cover Sticks* made of stainless steel, with or without Lock & Lift system

UperfilDesign

Modern bathrooms are barrier-free. Flush-to-floor showers create a whole new space experience in bathrooms. The shower is no longer somewhere you struggle to get into in order to put yourself through a routine washing process. In addition to design aspects, this new way of showering also makes extremely tough demands on the functionality of the drain. Only maximum flow rate and unlimited servicing possibilities can guarantee a safe function.

For more than 45 years now, KESSEL has been presenting innovations in draining technology. The products in our „KesselDesign“ range combine the technical know-how that comes from long years at the top of the market with a conscious high-quality design understatement. Unconditional functionality is at the beginning of every product development process. Only high-quality materials, stainless steel and impact-resistant plastic can meet these requirements. The result is the combination of an unwillingness to compromise on the technical side and an aesthetic attractive appearance, high draining capacities, straightforward access during cleaning and comprehensive accessories.

reddot design award
winner 2010

The UperfillDesign covers received the international red dot award in the category Product Design for their unmatched design quality.

DESIGN PLUS

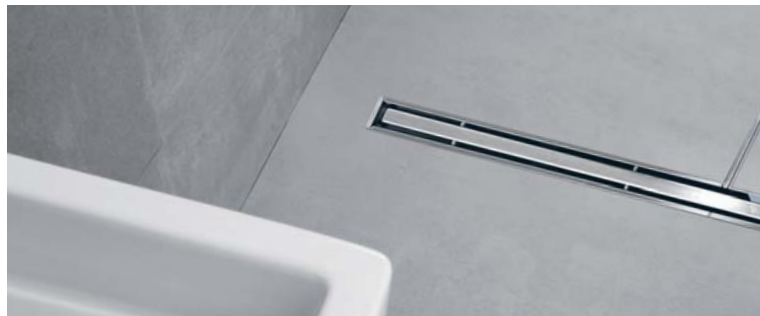

At the „ISH“ in Frankfurt, the world's leading trade fair for bathrooms as well as domestic and energy technology, our „Oval“ design cover won the „DESIGN PLUS Award“.

Individual channel insert (for example with custom engraved logo)

Space for individual ideas

Customized „Individual“ models are a real highlight of course.

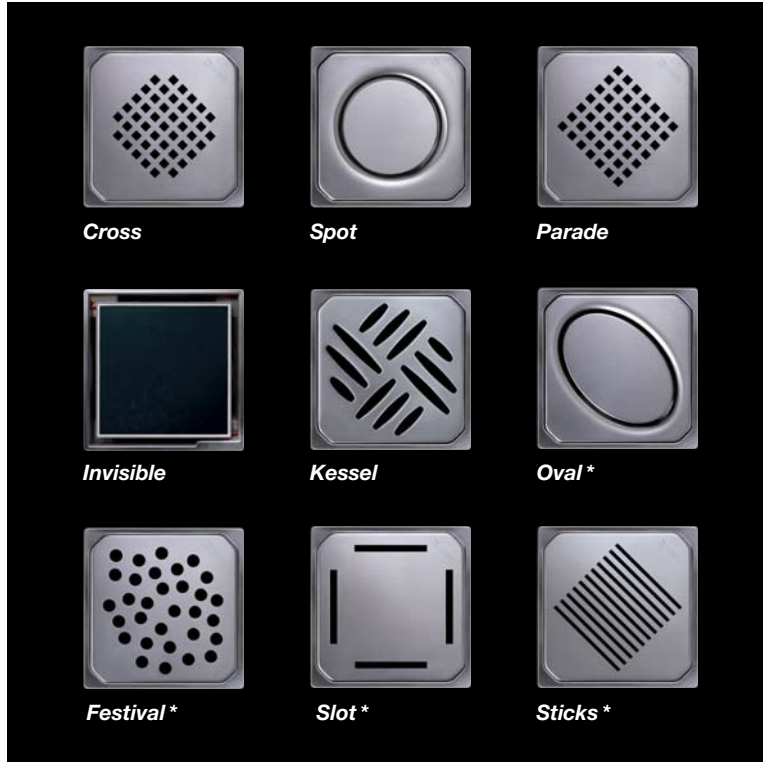

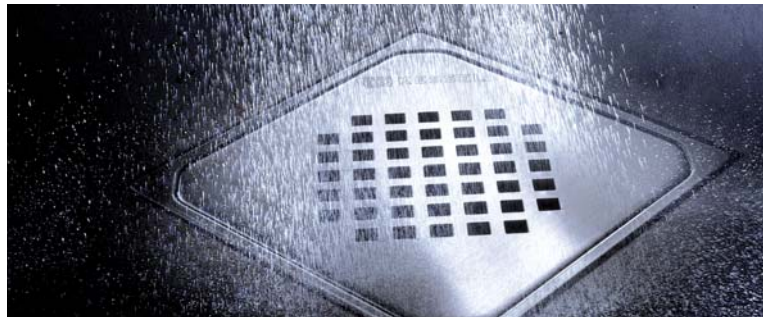

Decorative elements that really leave their mark on a bathroom such as coloured glass stones, dried flowers or other small accessories can be inserted in the illuminated glass insert, or company logos, such as the name of a hotel, are also possible.

There are no limits to fantasy and creativeness, and a consistently high-quality bathroom design can be perfectly realized, right down to the last detail.
